## Air Refill Kit

**Order no. 536689**

**GTIN 4030293305298**

The air refill kit allows you to top up the compressed air tank on all 18 V FLEX nailers and staplers quickly and easily. Thanks to the integrated 1/4-inch quick-connect coupling, the set can be easily connected to standard compressed-air hoses. The built-in air filter ensures that only clean compressed air enters the tool, which extends the service life of the nailer or stapler. The robust filling knob is designed for frequent use and allows for easy operation at the touch of a button.
