VCE-PS 25 Cyclone

Pre-separator for VCE safety vacuum cleaner

Order no. 533294

GTIN 4030293271340

- Effective separation of fine to coarse sucked-up material thanks to cyclone technology. Ideal for use in applications that create a lot of dust, max. separable particle size Ø 20 mm
- Relieves the safety vacuum cleaner's main filter. Large quantities of dust are collected by the pre-separator before they reach the safety vacuum cleaner, and with a constantly high suction power
- Connect the pre-separator to the VCE safety vacuum cleaner and the hose supplied. Static charges in the suction hose are discharged to the vacuum cleaner via the pre-separator and connecting hose
- The transparent and robust 25 litre container has 2 comfortable carrying handles. Stable thanks to the square design
- Fill level visible at all times
- Can be attached to the head of the VCE 33 and 44 vacuum cleaner without tools

Antistatic equipment

Technical data

Tank volume	25 L
Dimensions WxLxH	430 x 330 x 380 mm
Weight	4.1 kg

Standard equipment

1 Hose set for Cyclone Pre-separator VCE-PS 25 (533558)
1 PE disposal bag
