Cutting Power

Green sponge – PSX-G

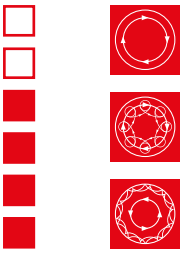

A very hard, reticulated foam with an innovative X-Cut surface that guarantees a uniform and very high removal rate even when used with the random orbital polisher. The X-Cut texture also reduces heat generation. The foam is heat resistant, tear resistant, and has a very good service life.

Violet sponge – PS-V

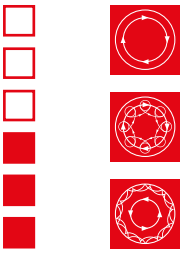

A hard, reticulated foam for optimum cooling and with a constant and high removal rate. It is slightly less abrasive than the green sponge PSX-G and is ideal for fresh coats of paint. The foam is heat resistant, tear resistant and has a good service life.

Orange sponge – PS-O

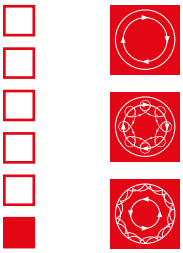

A medium-hard, reticulated foam with a fine foam texture. It is heat resistant, very tear resistant and has a good service life.

Red sponge – PS-R

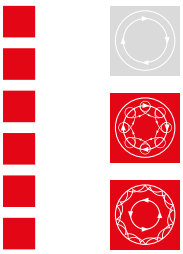

A very soft, reticulated foam with a fine foam texture. It has a special PerfectTouch sandwich structure with an additional, firmer, white foam layer which gives the pad greater rigidity. This special structure also increases the service life of the polishing pad.

Blue sponge – Microfibre polishing pad MC-PT 160

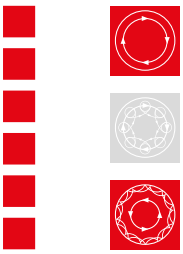

Especially for random orbital polishers, particularly those with a free-running pad. With these machines, a microfibre pad is more effective than a standard fleece pad for heavy cutting work. The microfibre pad is also equipped with the tried-and-tested PerfectTouch sandwich surface. This ensures good pressure distribution without softening the orbital movement.

White pad – Wool polishing pad TW-PT

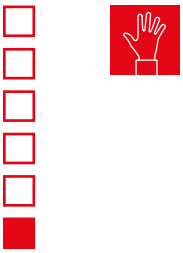

TopWool Pad made from 90% natural wool and 10% polyester. This combination gives it a longer service life and more volume. The special PerfectTouch structure with the additional layer of orange foam gives the pad gentle cushioning and greater rigidity.

Small red sponge – manual application sponge PUK-R 130

This sponge has an ergonomic shape and a very soft, reticulated foam with a fine foam texture. It is perfect for the manual application of sealants and care products to painted and plastic surfaces. An ideal supplement for difficult to reach places or sensitive surfaces that are difficult to treat with a tool, for example.
